GLASSWARE CARE

Storage:

- Avoid placing cutlery inside glasses.
- Only stack glasses designed for stacking.

Usage:

- Refrain from lifting glasses in clusters
 - Exercise caution to prevent contact with the beer tap.
 - Avoid pouring cold liquids into glasses straight from the dishwasher, as it may cause cracks.
- Preheat glasses for hot drinks by rinsing them under hot tap water.

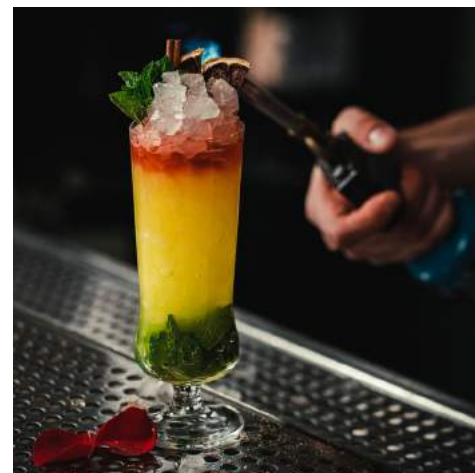

Cleaning:

These products are designed to endure the demands of the Foodservice and Hospitality Industry, including automatic dishwashers prevalent in most establishments. To maintain product quality, consider the following:

- Wash new glasses before use.
- Use a non-caustic detergent, as caustic detergents can affect head retention, etch the glass, and create a shadowy tinge. Ensure water on the premises is stored at 140°F; excessively hot water may bake debris onto the glass.
- Discard glasses with cracks or chips immediately; never put broken glasses in the dishwasher.

Hand-Wash Only:

Glasses labeled as such may chip or lose color when exposed to the high temperatures of a conventional dishwasher due to specialized pigments or artisan touches.
